Wein aus Trauben aus ökologischem Anbau

Over centuries, the Riesling grape has adapted perfectly to the soil and the climate of the Mosel river, delivering wonderful white wines. To me, as a doctor with a profound interest in naturopathy, sustainability carries a special meaning. That's why, for years, we have been cultivating our own vineyards in compliance with the principles of ecological farming. My staff and I place high demands on the health of the soils, vines and grapes. We are thrilled with the diversity of the plant and animal life in our vineyards and with the quality of our subtly fruitful wines. My recommendation: Serve this wine well chilled. It pairs well with meat and fish, as well as with most vegetarian dishes. Personally, I like combining it with a mixed salad.

With my highest recommendations,  
Dr. med. Renate Willkomm
