# OUR STORY

The Bousquet family hail from the city of **Carcassonne in the South of France** and have **4 generations** of history making wine. Our passion is to produce wines of superior quality, which is what led us to Argentina to begin a new chapter.

A 1990 vacation in Argentina was all it took. For the Bousquet family, it was love at first sight. The object of desire: **the Gualtallary Valley, a scenic, remote, arid terrain high in the Tupungato district of the Uco Valley in Argentina's Mendoza region, at 4,000ft/1200mts in the Andes foothills.**

Here, the Bousquet family discovered their dream terroir, an **ideal location in which to nurture organic wines.**

Fast-forward to the present and wine connoisseur recognize Gualtallary as the source of **Mendoza's finest wines.** Back then, it was **virgin territory:** nothing planted, no water above ground, no electricity and a single dirt track by way of access. Locals dismissed the area as too cold for growing grapes.

---

**BOUSQUET, ON THE OTHER HAND, RECKONED HE'D FOUND THE PERFECT BLEND BETWEEN HIS FRENCH HOMELAND AND THE NEW WORLD.**

# OUR PHILOSOPHY

---

Domaine Bousquet's philosophy is to focus on preserving the grapes high-quality characteristics, which is why gentle handling of the fruit is the guiding principle of our winery.

We are dedicated to farming organically while improving our land's biodiversity.

**WE BELIEVE THAT THE HEALTHIER THE VINEYARD,  
THE BETTER THE FRUIT AND, OF COURSE, THE  
WINE.**

In other words, by nourishing the land and treating it with respect, we know that the land will give us back its finest fruits.

# ORIGIN

---

## GUALTALLARY, UCO VALLEY MENDOZA, ARGENTINA

---

The Bousquet family hail from the city of Carcassonne in the South of France and have 4 generations of history making wine.

Our passion is to produce wines of superior quality, which is what led us to Argentina to begin a new chapter.

TUPUNGATO

# UCO VALLEY

Approx. 100 km southeast of city of Mendoza.  
Reputation for high-end winemaking.  
Growing destination for adventurously inclined visitors

High-altitude, harsh winters, warm/hot summers and cool nights. Thermal amplitude about 59° F/15° C, leading to intense color and tannic structure in grapes and creating ideal conditions for wines with aging potential.

Climate + water = decisive factors. Altitude, plus distance from far-off Atlantic to the east and Andes mountains on the west forming a against more humid winds blowing from the Pacific, shape basin's climate. Significant oscillations in the atmospheric conditions, creating pronounced seasonal variations.

Predominantly rocky soils with low fertility. Pebbles mixed with thick sand and some silt. Due to composition, these are permeable soils, without drainage or salinity issues. Presence of limestone in some places.

## KEY THINGS TO KNOW

# TUPUNGATO

## KEY THINGS TO KNOW

Jesuit missionaries establish settlement in Tupungato

17<sup>th</sup> century

### EARLY 1900s

Orchards, vineyards and other crops planted

### MID-1990

Drip irrigation starts to replace traditional flood irrigation on slopes and in more difficult topographies

1900s

### EARLY 2000s

Tupungato starts to attract attention among international wine media and lovers of Argentine wines

### 2001

Local wineries, including Domaine Bousquet, address local infrastructure issues, uniting to fund construction of new road leading to Mendoza

### 2006

Tupungato-Valle de Tupungato I.G. (Mendoza) established under Argentina's system of appellations. (*Indicaciones Geográficas* = Geographical Indications, abbreviated to GIs in English)

2000's

Luján

Tupungato

■ Domaine  
Bousquet

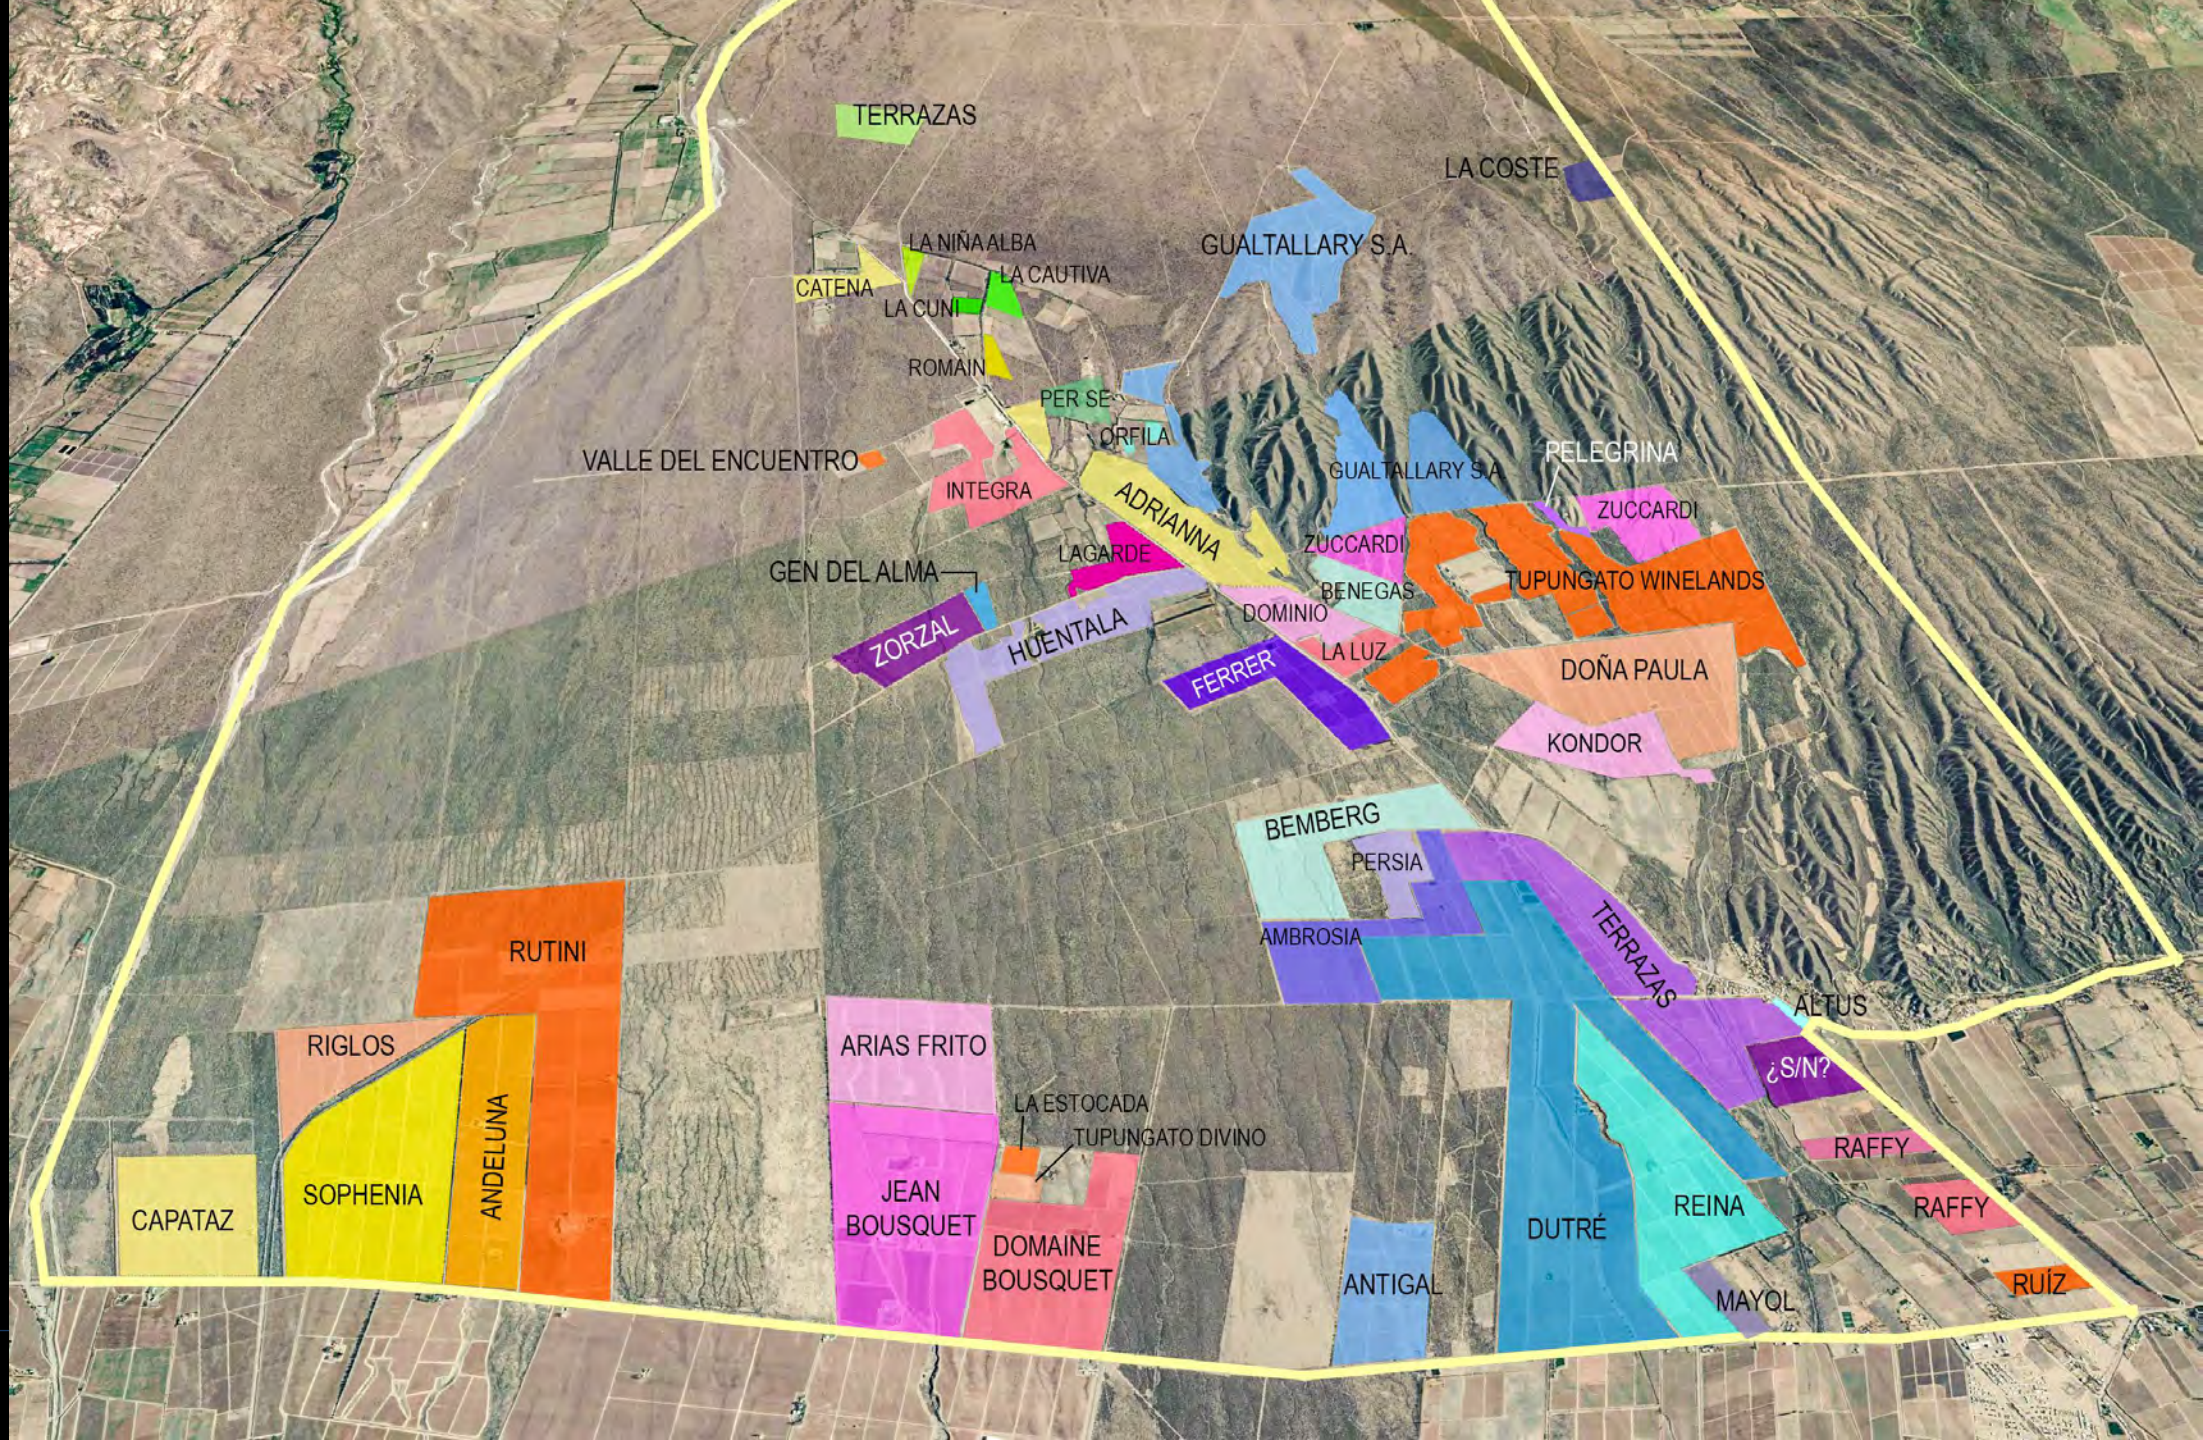

## TUPUNGATO ALTITUDE & CLIMATE

The Tupungato GI (Geographic Indication) ranges in altitude from 1,200 meters/3,937 feet to 2,200 meters/7,200 feet, east to west

A difference of 6° C/10.8° F exists between the base of the Tupungato GI and its summit, with an average temperature drop of 1° C/1.8° F for every 150-meter /492 feet increase in altitude

# GUALTALLARY - OUR TERROIR

## VINEYARD

Gualtallary, Tupungato, Uco Valley

100% certified organic virgin vineyards

260 Hectares / 640 Acres

300 days of intense alpine sunlight

Idyllic wine-growing conditions

## SOIL

Sandy soil produces an elegant style of wines.

Low fertility for desirable vine stress.

Permeable for good drainage.

No salinity issues.

## CLIMATE

Cool climate and constant fresh air

Desert-like climate.

59°F/15°C day/night diurnal temperature shift

Average rainfall of 8 in/200mm a year.

Drip irrigation system for water conservation

Pure Andes snowmelt used to irrigate, creates lower pH, higher acidity and more color in the wine

## VINES

Planted on virgin land in 1998

Manual harvest with low yields

Roots of organically grown plants penetrate deeper, absorbing trace minerals that give wines their authentic local taste

Vineyard management is customized to soil & varietal

# GUALTALLARY

## THE SOILS

### SINGULAR GEOLOGY, DIVERSE SOIL TYPES

- Alluvial Deposits from Las Tunas River
  - Alluvial fan defines three terraces: 2 and 3 are plantation areas.
  - Similar composition: stones and sand (75/80%); clay and silt (15/20%)
- Colluvial Deposits from Frontal Range
  - Small areas around mountain range, though largely irrelevant where new plantings concerned ...
- Windblown Topsoils
  - Account for extensive portion of GI, formed by loess (loosely compacted yellowish-gray deposit of windblown sediment) of variable depth
- Superficial Bedrock
  - Extremely rare plantings over calcium carbonate-coated stones and stone-encrusted calcareous mother rock.

## THE 14 WINE SOIL TYPES TO KNOW

VINEPAIR

VINEPAIR.COM

## GUALTALLARY THE SOILS

---

Desert soils with typical small bush vegetation in which leaching of calcium carbonates by alluviums takes place, moving mineral content to deeper horizons.

There, calcium builds up and solidifies, forming a hard coarse rock called caliche, as well as coating the with a white patina of chalk. This type of soil is the most frequent in Gualtallary.

### WIND-DEPOSITED SOIL

# GUALTALLARY THE SOILS

---

# GUALTALLARY THE SOILS

---

*We believe that the healthier the vineyard,  
the better the fruit, and of course the  
wine.*

## JOIN THE ORGANIC REVOLUTION

---

Organic farming is a global system of production management that encourages and highlights healthy agroecosystems, including its diversity, cycles, and the soil's biological activity.

This is achieved by applying only agronomical, biological and mechanical methods as opposed to synthetic material.

OUR MISSION IS TO  
CREATE SUSTAINABLE WINES  
FOR OUR ENVIRONMENT AND FOR PEOPLE.

This is why we have developed a 360° vision

and winery

# GREEN CERTIFICATIONS DEFINED

Third party certifiers are used to prevent “greenwashing.” Producers must prove they are doing what they say they are doing. Certifying agencies not only require annual reports, but regular on-site inspections.

CERTIFICATION ORGANIZATIONS

| Organic   | Biodynamic   | Sustainable   | Additional Certifications   |
|---|--|---|---|
|    |   |     |     |

# SUSTAINABLE

Aims to reduce environmental degradation by reducing use of chemicals, encouraging biodiversity and a healthy soil.

Sustainability means acting as a steward for future generations, seeing the land as a resource that must be replenished rather than overused.

More flexible in the vineyard and winery than organics or biodynamics, it denotes a less stringent approach. Chemicals can be used in a pinch. Because it takes economic sustainability into account.

**More recently, the term has expanded in meaning to include social and economic impact – a holistic view that also looks at working conditions, community involvement, packaging, transportation and consumer education such as moderation campaigns.**

# ORGANIC

No man-made chemicals vs. just minimizing use as with sustainability. All additives are organic, in the vineyard and at the winery (fining products, yeast, etc.). Grapes are grown organically and there are no-GMOs.

**Because of differing regulations in the U.S. and EU concerning sulfites, EU wines labeled “organic” in the EU may have to state “made with organic grapes” when sold in the U.S.**

In the U.S., no sulfites can be added during winemaking and the total cannot exceed 100 parts per million. In the EU, it's 120 ppm for reds and 150 ppm for whites and rosés.

# BIODYNAMIC

Combines the methods of organic agriculture (no man-made chemicals, no pesticides) with **a philosophy where the land is part of the cosmos, influenced by tides, the moon, and stars.**

Activities are planned according to the phases of the moon and time of day – there are root, leaf, flower and fruit days and hours.

The emphasis is on prevention of “illness” by making vines naturally more resistant to disease. Homeopathic infusions from plants and dung compost are the “foods” used to nurture the plants. Though quite spiritual in basis, winegrowers around the world see this agricultural method as producing not only healthier soil, but fruit with thicker skins, plants with stronger wood, and earlier ripening.

BIODYVIN

## LUTEN FREE

**Gluten-free certification is a process designed to protect consumers with celiac disease and other gluten-related disorders.**

There are two places gluten can “enter” a wine: during fining and with the barrel. However, wheat-based fining agents are extremely rare. In barrels, a wheat-water paste is sometime used to seal the space between the barrel body and the head. The total amount of flour used is one ounce, which translates into a theoretical transfer of 5 ppm —one quarter of the allowable amount for US gluten-free certification of 20 ppm) if all the flour leached into the wine because the 60-gallon barrel was leaking.

Bottom line: nearly all wines are gluten-free, whether they have certification or not.

**Gluten Free certifies the product.**

## OSHER

Kosher wine is a grape wine that is **produced according to Judaism's religious and dietary laws**. In order for a wine to be kosher, it must be created under a rabbi's immediate supervision, with only Sabbath-observant Jewish males touching the grapes from the crushing phase through the bottling.

Kosher-for-Passover wines must be made in a cellar that's free of bread, dough, or grain products, or, perhaps most importantly, leavening agents (such as any non-kosher non-indigenous yeasts, which are often added in wineries to kickstart fermentation

ORGANIC KOSHER WINE

## egan

**This label guarantees the wine is vegan; the wine has not come into contact with any animal products during production or bottling.**

In practice, that means that fining – the act of removing proteins called “colloids” that later cause a wine to be hazy – is done not with egg whites, casein (found in milk) or isinglass, a product derived from fish bladders, but with bentonite clay carbon, limestone, kaolin clay, plant casein or silica gel.

In bottling, the bottle is not sealed with beeswax or with compound corks made using milk-based glues.

Vegan certification, in general, does not cover what happens in the vineyard – so guano, for example, can be used to fertilize.

**Vegan certifies the product.**

ROC™ has adopted USDA Organic standards as a baseline and then takes it to the next level by requiring certification in three additional areas:

1. Soil health and land management
2. Animal welfare and
3. Farmer and worker fairness.

- The California-based Regenerative Organic Alliance (motto: “Farm like the world depends on it,”) has adopted USDA Organic standards as a baseline. ROC™ requires certification in three areas: soil health and land management, animal welfare, and farmer and worker fairness. Sensibly, potential members apply existing certifications from blue chip organizations such as Demeter, Certified Fair Trade, and Certified Humane, among others, to meet requirements.
- *Domaine Bousquet becomes one of only four wineries to do so to date, and the first outside the United States to meet ROC™’s stringent requirements.*

# SUSTAINABLE

## RECENT CERTIFICATIONS

- The California-based Regenerative Organic Alliance (motto: “Farm like the world depends on it,”) has adopted USDA Organic standards as a baseline. ROC™ requires certification in three areas: soil health and land management, animal welfare, and farmer and worker fairness. Sensibly, potential members apply existing certifications from blue chip organizations such as Demeter, Certified Fair Trade, and Certified Humane, among others, to meet requirements.
- Domaine Bousquet co-owner and CEO Anne Bousquet cites the potential reach of ROC™ certification: **“Individual farmers and agricultural entities seeking to fight climate change and campaign for social justice are to be respected, but they cannot move the needle on their own. If we are to make a meaningful difference, then we must work together, and ROC™ certification effectively unites all sectors of farming.”**
- *Domaine Bousquet becomes one of only four wineries to do so to date, and the first outside the United States to meet ROC™’s stringent requirements.*

- B Corp companies, all for-profits organizations, commit to being a force for good over the long-term. Members of the global non-profit network work toward a more inclusive and regenerative global economy, for the benefit of people and communities around the world and for the good of our planet. In addition to demonstrating high standards of social and environmental performance, public transparency, and legal accountability, B Corp members commit to continuous improvement, and are assessed and verified every three years.
- Anne Bousquet, co-owner and CEO of Domaine Bousquet, notes that **“Our winery is located in a small, remote community, so, of course, we help each other. We are an extended family. This way of thinking and looking at the world carries over into everything we do both at home and at work. We are a global extended family and together we become a force for good in the local community and within the world at large.”**
- The B Corp community in the U.S. and Canada is over 1,700 companies-strong, with well-known names such as Ben & Jerry’s, Patagonia, Warby Parker, and 24 wineries, including two from Argentina. Globally, there are currently 5,538 B Corp companies in 84 countries, across 157 industries.

# A REAL EVOLUTION OF ORGANIC WINE CONSUMPTION IN EUROPE

**48%**

of Europeans say they often **buy organic** products.  
*+11 pts vs 2015*

Organic products purchases 2015 vs 2021:

- EU 48% vs 37%
- France 53% vs 38%
- UK 41% vs 32%
- Germany 50% vs 41%

Organic wine purchases 2015 vs 2021:

- EU 29% vs 17%
- France 36% vs 17%
- UK 27% vs 18%
- Germany 23% vs 18%

**29%**

of Europeans has **integrated organic wine** in their consumption basket compared to 17% in 2015.

**THESE FIGURES ARE VERY LIKELY TO INCREASE SINCE THE ORGANIC WINE CONSUMER IS YOUNGER THAN THE AVERAGE WINE CONSUMER.**

# ORGANIC WINE CONSUMPTION IN EUROPE

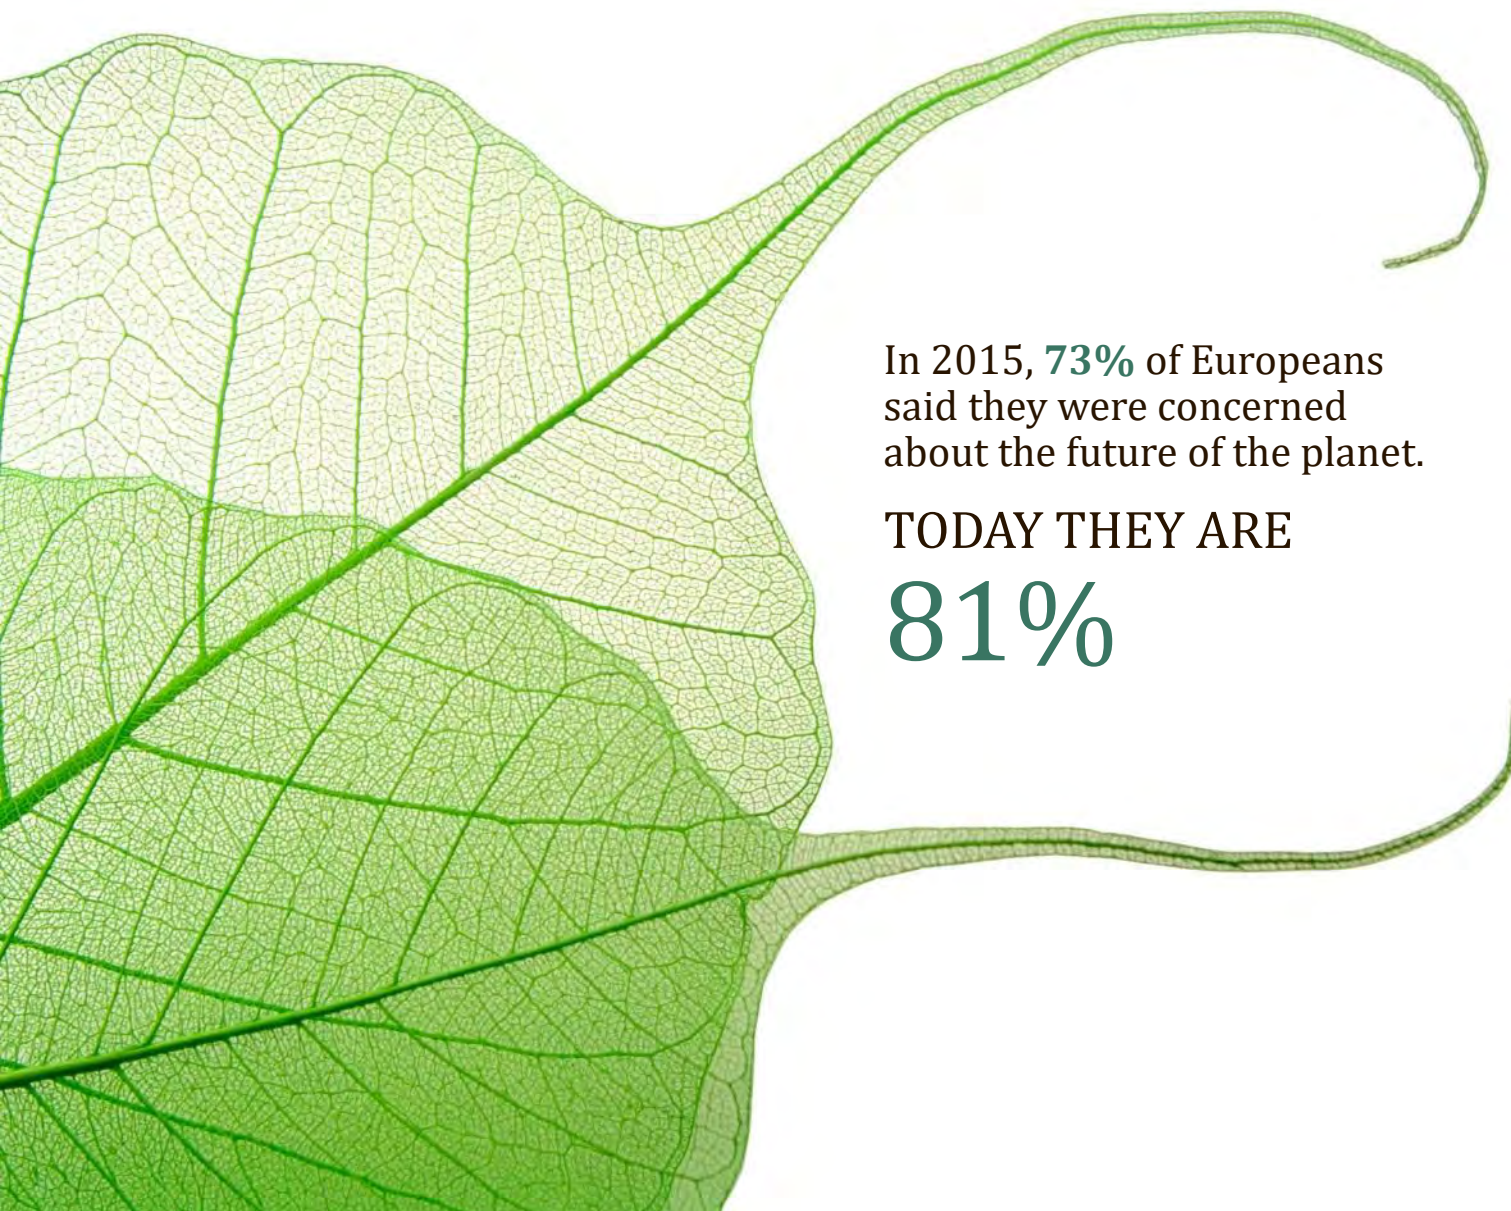

## 46%

Under 35-year-old has consumed organic wine compared only to 38% for the over 55 years old

The consumer of organic wine is structurally **younger than the average wine consumer.**

- Man
- Young
- Urban
- Educated
- High income

In 2015, **73%** of Europeans said they were concerned about the future of the planet.

TODAY THEY ARE

**81%**

## ENVIRONMENTAL CONCERNS ARE REACHING A PEAK

---

Organic wine purchases 2015 vs 2021:

- EU 81% vs 73%
- France 87% vs 86%
- UK 83% vs 69%
- Germany 76% vs 65%

**PREMIUM ORGANIC  
VARIETALS**

Malbec

Cabernet  
Sauvignon

Rosé

Sauvignon  
Blanc

Unoaked  
Chardonnay

Chardonnay  
Torrontés

Domaine Bousquet's **Premium** varietal series comprises a blend of estate and purchased organic fruit from the Uco Valley in the high Andean foothills. The grapes benefit from major day/night temperature swings, achieving exuberant ripeness while retaining the juiciness that invites a second glass. The wines are vinified with a French sensibility. The wines are un-oaked – an on-trend sensibility of little or no oak to let the fruit shine through and make the wines extremely food-friendly.

RESERVE ORGANIC

Malbec

Cabernet  
Sauvignon

Cabernet  
Franc

Pinot Noir

Chardonnay

The **Reserve Wines** from this pioneering, family-owned winery in Gualtallary's high Andean foothills are all made with hand-picked, organic, estate fruit. A 4,000-foot elevation and low yields ensure grapes here offer more aroma, body and flavor, while preserving food-friendly fresh acidity.

Gran  
Malbec

Gran  
Cabernet Sauvignon

Gran  
Chardonnay

**Gran Bousquet** began life in the first vineyard planted by the Bousquet family in 2000, after their arrival from France. In the high desert Uco Valley in Argentina's Mendoza region, the site captured their imagination on account of its sand (low-fertility sandy soil makes for elegant wines) and access to water. Grapes here are the last to be harvested, ensuring more richness and body.
