

DOMAINE
BOUSQUET
Naturally Elegant Wines™

THE WORLD'S MOST AWARDED
ORGANIC WINE PRODUCER

OUR MISSION

We are committed to the production of world-class, high quality wines through the application of both French and Argentine knowhow in the winemaking process. To achieve our goal, we have established our winery in the exceptional terroir of Tupungato, Valle de Uco, in Mendoza, which offers ideal weather conditions and allows us to produce high quality wines from organic grapes.

1990

Jean Bousquet, a 3rd generation winemaker from France started to travel around the world looking for vineyards with better weather conditions and grape quality.

1998

After a long search around the world, Jean Bousquet chose to settle in Argentina. He was convinced that Argentina would be one of the best places to make one of the best wine in the world.

2002

Domaine Bousquet's first harvest, which was rated 88 by the Wine Spectator.

2004

Construction of the first part of the winery started.

2005

Domaine Bousquet become fully certified organic. Labid Al Ameri and Anne Bousquet join the winery.

2008

Domaine Bousquet is exporting more than one million bottles of premium wine to more than 30 countries worldwide and it is among top 25 wineries in Argentina in terms of exports.

2014

Domaine Bousquet receives certification as a Fair Trade Plantation and Processor by IMO.

2015

Domaine Bousquet is now exporting 4 million bottles all over the world to more than 40 countries and is one of the leading producers and exporters of organic wines in South America.

DOMAINE BOUSQUET WINERY

TUPUNGATO VALLEY, MENDOZA ARGENTINA

- Domaine Bousquet Winery is located 1200m. above sea level in Tupungato valley, Mendoza Argentina.
- Primary focus is the production of certified organic wines through sustainable farming.
- Domaine Bousquet is certified as an organic farm and production facility by Argencert in affiliation with the ECOCERT.
- Domaine Bousquet ranks among the top 15 Argentinean wine exporters and the leader exporter of organic wine

THE WINERY'S PHILOSOPHY

The philosophy of Domaine Bousquet is to focus on preserving the grape's high quality characteristics, which is why gentle handling of the fruit is the guiding principle of our winery.

Grapes arrive from the Vineyard in boxes to the receiving area, where they are hand-sorted before going to the next stage.

THE VINEYARD AND TUPUNGATO

- The vineyard is situated on the foothills of the Andes Mountains, where the vines are irrigated by a dripping system.
- Altitude: 1200 meters/4000 ft. above sea level. Warm days and cool nights with daily temperature fluctuation of up to 25 degrees Celsius.
- The vineyards are in Tupungato; 110 hectares, 80 hectares and Maipu; 75 hectares (265 hectares in total). The vines are mostly hand harvested and treated with natural products which maintains the integrity of our organic certification.

WHY ORGANIC?

- We believe that the healthier the vineyard, the better the fruit, and of course the wine. In other words, by nourishing the land, and treating it with respect, we know that the land will give us back its finest fruits.
- Organic farming, is a global system of production management that forments and highlights healthy agroecosystems, including its diversity, cycles, and the soils biological activity. This is acheived by applying only agronomical, biological and mecanical methods as opposed to synthetic material.

CERTIFIED BY

OBJECTIVES

- NO chemical products such as pesticides, herbicides, and fertelizers.
- Use healthy and natural products that maintain the soil healthy and durable.
- Efficient use of natural resources such as water and sun

SOIL AND WATER TREATMENT

- **Minimum farming** is realized, trying not to break the structure of the ground, to maintain the biodiversity and the fertility of the soil.
- **Green fertilizers** are implanted with the purpose of guaranteeing the vegetation absence (mainly invading weeds) and improves the conditions for the growth of the plants when increasing temperatures of the ground and therefore avoiding the evaporation of the water.
- **Water comes from the underground**, which is a pure water that comes from the Andes mountains.
- **Irrigation** is used through a **dripping system** which is a very efficient way to use water since water is a limited resource.

THE CELLARS

The cellar has a capacity of about 4.5 million liters of premium wine which include stainless and cements vats, as well as French and American oak barrels.

THE WINES PREMIUM VARIETALS

MALBEC • TORRENTESCHARDONNAY •

- Fresh fruit and easy to drink.
- They are modern style, with a nice fruit concentration thanks to the consistent exposure and moderate to low use of oak.
- Red wines spent 6 months French oak.

THE WINES RESERVE LINE

MALBEC • MALBEC SWEET

- Integral vinification and aged in French oak barrels during 10-12 months for the red.
- Their style is elegant and velvety, with fruit concentration, beautiful color, and long finish.

THE WINES

THE BLENDED WINES

AMERI SINGLE VINEYARD

THE WINES

THE GRANDE RESERVE LINE

MALBEC

- Integral vinification of the best hand selected fruit of the Estate and aged in French oak barrels during 12 months.
- These are characterized by their elegant style, with good oak integration and silky tannins.

THE WINES SPARKLING LINE

TRADITIONAL CHARDONNAY BRUT • TRADITIONAL CHARDONNAY BRUT ROSE • PINOT NOIR/CHARDONNAY BRUT ROSE
PINOT NOIR/CHARDONNAY BRUT

- Traditional Method and Non-Traditional Sparkling Wines are aged in the bottle for 6 months to enhance the elegant delicate bubbles vital to the Brut style.
- Harvest is done manually to preserve the delicate fruit and protect the integrity of the vinification process.
